Download

SEE: (TechRepublic)To configure Microsoft Office 365 to use macOS Sierra's native Mail, Calendar, and Contacts applications, open System Preferences and click Internet Accounts.

Use macOS' System Preferences' Internet Accounts to add Office 365 services to macOS.. Alternatively, if Outlook is being opened for the first time, a setup page should appear.. Click the Add Account button, specify the type of account you wish to add (Exchange or Office 365), and then follow the prompts ( Figure A).
